

ENVIRONMENTAL POLICY

Arabella Golf Mallorca, belonging to the Schörghuber Company Group, offers the possibility of enjoying 4 magnificent golf courses: Son Muntaner, Son Vida, Son Quint and Pitch and Putt, located in Palma de Mallorca, surrounded by a natural environment with a great variety of native vegetation and fauna.

Ever since the Schörghuber Group of Companies established itself in Mallorca more than 30 years ago, the commitment to the community and to environmentally friendly management has been very much in mind. For this reason, back in 2000, Son Muntaner was the first golf course in Europe to achieve ISO 14001 and EMAS certification. In 2012 we decided to extend ISO 14001 certification to all Arabella Golf Mallorca courses, for the scope of Golf Course Management, and from 2021 we will have EMAS registration for the whole organisation.

Therefore, with the intention of advancing in our commitment to sustainability and continuous improvement, we intend to:

- Being closely related to the natural environment, our purpose as a company includes the creation of value for the environment around us.
- To take the environment into account as an integral part of Arabella Golf's strategy; every project or activity developed always takes into account its environmental impact, and the focus is always to guarantee sustainability and exquisite compliance with the applicable legal regulations and the requirements of the environmental certifications to which we are voluntarily subscribed.
- To align ourselves with the sustainable development objectives promoted by the United Nations related to the company's activities (3 health and wellbeing, 4 quality education, 6 water management, 7 clean energy, 12 responsible production and consumption, 13 climate action, 15 life in ecosystems, 17 alliances to achieve objectives).
- To transform Arabella Golf into a circular company, based on the philosophy of the 4R's: Reduce, Reuse, Recycle, Recover, and to structure them in four main axes: water management, energy management, responsible production and consumption, and respect for the natural environment.
- Commitment to innovation and leadership in tackling environmental challenges, in order to be an international benchmark in the incorporation of environmental improvements.

Palma, 8th November 2021

Bernat Llobera
Director de Golf
